

THE GOOD NEWS
AND BETTER NEWS
ABOUT SCHICK CDR.®

LESS RADIATION SAFER DENTISTRY

Your X-rays will still be taken only as necessary and as recommended by the American Dental Association. In addition, they'll still be covered under your insurance benefits. Thanks to our new digital radiography system (Schick CDR), they'll also be safer, better, and faster for everyone concerned.

If you'd like more information about Schick CDR, please feel free to ask anyone on our staff.

SCHICK TECHNOLOGIES INC.

30-00 47th Avenue Long Island City, NY 11101

888-472-4425 www.schicktech.com

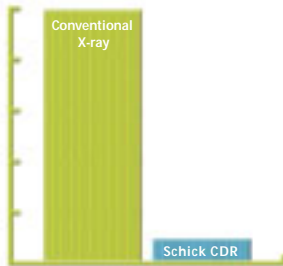

B1031022

This office features
low dosage
computerized X-rays.

THE GOOD NEWS IS IT'S SAFER AND FASTER THAN CONVENTIONAL FILM X-RAYS.

As you know, X-rays play an important role in the diagnosis of dental problems. However, many people are concerned about exposure to X-ray radiation. That's one of the reasons why this office has switched to Schick digital radiography. It gives us the accurate images we need to treat you properly – but does so with up to 85% less radiation than regular X-rays.

Schick CDR uses up to 85% less radiation than conventional film.

What's more, Schick CDR images are instantaneous. There's no film to process or mount. That means our dental staff can spend less time developing X-rays in the darkroom – and more time caring for you.

The CDR image is easier to interpret and understand than conventional X-rays.

CDR sensors are more accurate and comfortable than regular film.

THE BETTER NEWS IS IT'S GOOD FOR YOU AND SAFE FOR YOU AND THE ENVIRONMENT.

An image taken with the Schick CDR system can actually lead to a better diagnosis of your dental problems. That's because it can be magnified 300x to enhance diagnosis, manipulated to correct contrast, and even color-adjusted to reveal hidden problems.

Best of all, our new Schick digital radiography system requires none of the harsh chemicals used in conventional X-ray processing. That means we don't have to worry about disposing of hazardous waste – and hurting our environment in the process.
